Desktops

> Where does StealthAUDIT fit?

Hardware, Software, Security, Migration Preps, Maintenance & Clean-up, Configuration Management, Health & Diagnostics, and more.

> Why should you use StealthAUDIT?

- Validate all patches and hotfixes are applied to all systems at both the operating system and application levels
- Identify malicious and unapproved software installed on user's machines
- Verify configuration compliance according to Organizational, Regulatory, and Industry Best Practice standards
- Understand permissions, rights, and access to all or information sensitive workstations
- Perform gap analysis to determine readiness for migrations or upgrades

SERVERS – Core Competencies

- Compliance
- Health & Diagnostics
- Hardware & Software Inventory
- Configuration
 Management
- Vulnerability & Security

Assessment

Ris AUTHOR ESCRIPT	STEALTHUIS T	echnologies, Inc. Ides a scole card for each vulnerability grouped by severity and by host name.	
ulner	abilities by S	everity by Host	Expand
Score	PropertyValue	SA_Description	Sector Sector
Sever	ity : CRITICAL! (COL	UNT=212)	
🗆 Hos	t : PB8238 (COUNT	9	1
1	NOT PATCHED	Hosts where the MS07-044 security bulletin for MS Excel has NOT been applied.	1
1	NOT PATCHED	Hosts where the MS07-024 security bulletin has NOT been applied.	
(NOT PATCHED	Hosts where the MS07-036 security bulletin for Excel has NOT been applied.	
i.	NOT PATCHED	Hosts where the MS07-023 Security Bulletin for Excel has N0T been applied.	1
🖃 Hos	t : SBNJENG02 (COU	NT=1)	4
20		Offline host has unknown set of vulnerabilities	1
🖻 Hos	t : SBNJENG04 (COU	NT=1)	
-	NOT PATCHED	Hosts where the MS06-012 security bulletin for Excel 2003 has NOT been applied	

Servers

> Where does StealthAUDIT fit?

 Hardware, Software, Security & Vulnerability Assessment, File System Maintenance & Clean-up, Configuration Management, Health & Diagnostics, and more.

> Why should you use StealthAUDIT?

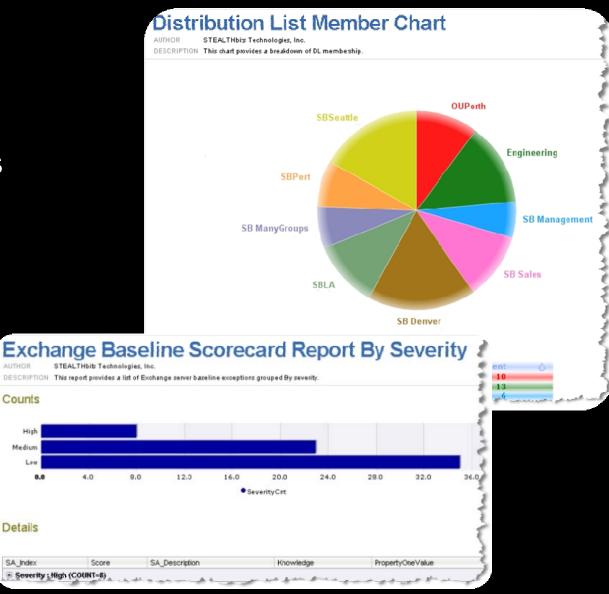

- Validate all patches and hotfixes are applied to all systems at both the operating system and application levels
- Comprehensive, flexible, simplified Server baseline and configuration management
- Verify configuration compliance according to Organizational, Regulatory, and Industry Best Practice standards
- > Understand permissions, rights, and access to all or information sensitive servers
- Maintain system health through proactive capacity planning and removal of stale or unused resources

EXCHANGE – Core Competencies

EALTH 🗛

- Configuration
 Management
- Message-flow Statistics
- Exchange Assessment
- Compliance
- Operating System
 Dependencies
- Active Directory Dependencies
- Exchange InFocus
 Dashboard
- Capacity Planning and Trending

EXCHANGE

> Where does StealthAUDIT fit?

StealthAUDIT is a complete Exchange management solution providing comprehensive visibility into the entire Exchange application and all of its associated dependencies

Why should you use StealthAUDIT?

- Detect critical configuration changes to reduce and avoid outages
- Identify growth trends to assist in capacity planning efforts
- Programmatically Assess and Clean-up stale or unneeded content (PF, MB, DL)
- Obtain complete visibility into who has access to what and where
- Analyze Tracking Logs while reducing storage space and network bandwidth by up to 96%

ACTIVE DIRECTORY – Core Competencies

- Advanced Security
- Compliance
- Infrastructure
- Maintenance & Cleanup
- Operations

ACTIVE DIRECTORY

> Where does StealthAUDIT fit?

StealthAUDIT is a complete Active Directory management solution providing comprehensive visibility into the entire AD structure

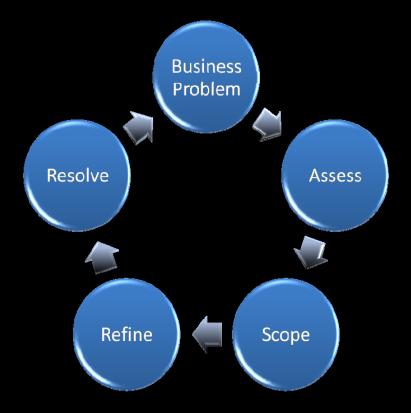

Why should you use StealthAUDIT?

- Determine who is making changes in AD
- Adhere to configuration standards
- Optimize the performance of your AD infrastructure
- Streamline clean-up and maintenance efforts with Action Modules
- Understand policy enforcement

StealthAUDIT Action Module Framework

- Closes out the loop
 - Assess, Refine, Resolve
- Works with real-world workflow
- Automates mass operations
 - Public Folders
 - Mailboxes
- Used when targets exceed practical limits of manual operations

StealthAUDIT Action Module Framework

Example – Public Folders
